

Summary:

Software Expert with 12+ years of experience in designing, developing, and supporting applications developed on Power Platform, SharePoint Online, On-Prem, Azure, and ASP.NET technologies.

Power Platform:

- Strong architectural understanding of developing solutions in Power Apps, Power Automate, Power Virtual Agents, and Power Pages
- Expertise in creating custom connectors for Power BI, creating reporting, searching functionalities in Power BI.
- Exposure to creating Dashboard, and KPIs in Power BI and integrating/embedding them in SharePoint and Power Apps.
- Expertise in migrating legacy applications based on PEGA, Nintex, OpenText, etc., to Power Platform
- Extensively worked on designing the information architecture for Dataverse (Formerly CDS) and migrating legacy databases to Dataverse.
- Expertise with COE kit implementation for MS Power Platform Administration, Governance, and Adoption.
- Experience in creating Power Virtual Agents (BOTs) for the Helpdesk, FAQs, and Learning Management Systems and converting InfoPath forms and Nintex forms to Canvas apps, Power Pages.
- Extensively worked on converting SharePoint designer workflows, Nintex workflows, and Approval workflows to Power Automate workflows.

MS SharePoint & M365

- Strong command of designing, architecting, and governing different versions of SharePoint farms.
- Expertise in migrating to SharePoint Online from SharePoint 2016/2013/2010 using the Sharegate tool and SPMT tools.
- Expert in developing SPFX components for web parts, field customizations, and extensions.
- Experience with SharePoint's application services framework including implementation, and configuration. Search, Managed Metadata, and User Profile Services.
- Proven ability in developing custom solutions for SharePoint on-Prem and SPO.
- Strong command of PowerShell scripting WRT to M365, Teams, SharePoint, and OneDrive.

Others:

- Expertise in developing .NET web and Windows applications using ASP.NET, C#, ASP.NET Core and Windows Forms.
- Hands-on experience with Azure functions, Login Apps, Azure Automation, Graph API, and Identity Manager.
- Hands-on experience in customizing the APIs for OKTA, Service Now, and collections for POSTMAN.
- Expertise in using Bootstrap, React JS, Fluent UI, and Vue.js frameworks.
- Extensively worked with Migration and governance tools like Nintex, AvePoint, Metalogix Migration Manager, Sharegate, OKTA, and Figma UI.

Technical Skills:

Microsoft Technologies	SharePoint: SP 2010/2013/2016 On-Prem and SharePoint Online Microsoft 365: SharePoint Online, MS Teams, OneDrive, MS Forms, Lists Power Platform: PowerApps, Power BI, Power Automate, Power Virtual Agents, Dataverse (CDS), and Power Pages. Azure: Azure DevOps, Azure Automation, Logic Apps, and Functions. .NET: C#, ASP.NET, ASP.NET Core, Windows Forms
Frameworks	Bootstrap, React JS, Vue.js, Fluent UI, Node JS
Databases	MS SQL Server 2008/2008R2/2012/2014

Third-Party Tools	Nintex, AvePoint, Metalogix Migration Manager, Sharegate, OKTA, Figma UI
