Summary

It seems like an extraordinary accomplishment when you at long last get the code directly following quite a while of investigating. Truly, the individuals who have never done programming will never know the inclination. It seems like the entire world is underneath you when you at long last devise and execute effectively a muddled calculation for an intricate activity. I am a full-stack software **developer** with 7 years of experience in coding, reviewing program functionality, establishing system improvements, and testing for security precautions. Equally adept at developing software for desktop computers, cloud-based applications, and mobile devices. My next goal in software development career is becoming an expert in **Java** programming language as well as non-relational databases. I also want to find a great opportunity in one of the large-scale companies to learn more about team leadership from their team leaders. **Java** (Spring Framework) Couchbase Laravel MySQL Oracle C# JavaScript (Vue.js, React.js, Next.js)

Work History

- **Technical Consultant Rego Consulting**
- **Full Stack **Developer** Vyalux**
- **Software **Developer** Deep Dimension**

- Software Engineer Usaa
- Unity And Web **Developer** Deep Dimension
- Full Stack **Developer** Vyalux
