

Zam M

Sr. Java Developer

"Unlock the full potential of Java with a Senior Java Developer"

As a Senior Java Developer, I have years of experience in building complex, scalable, and robust applications using Java technologies. Experts in developing backend solutions and integrating them with front-end frameworks to deliver seamless user experiences. With a keen eye for detail and a passion for clean, efficient code, I will bring your vision to life with precision and speed. So why wait? Let's bring your project to the next level with me today!

WORK EXPERIENCE

Full-Stack Developer Contractor/Self-employed

03/2018 - Present,

Achievements/Tasks

- Developing web and mobile applications in various roles and capacities.
- Developed over 20+ original applications.
- Working with Java, Spring, Spring boot and Microservices Architecture.
- Undertake detailed programming and development assignments for both front-end public and internal websites, as well as complex back-end server code.
- Developed a custom reporting tool using Java and MySQL, which reduced report generation time by 50%
- Conceptualized, redesigned, and presented enhancements to the data warehouse and stored SQL procedures, leading to 100x increased query performance

Software Engineer NiteSun Technologies

01/2016 - 02/2018,

Achievements/Tasks

- Collaborated with cross-functional teams to design and develop Java-based applications.
- Facilitated continuous interaction between users, developers, and QA teams throughout the SDLC, resulting in a 95% testing success rate, 60% improvement in code quality and reliability of the system.
- Developed a custom reporting tool using Java and MySQL, which reduced report generation time by 50%
- Developed and maintained a high-traffic web application using Java, Spring Boot, and Hibernate frameworks.
- Participated in agile development methodologies, including sprint planning, daily stand-ups, and retrospectives.
- Mentored junior developers on best practices for Java development and fintech applications.

EDUCATION

Bachelor's degree, Computer Sciences

SKILLS

Java

Spring boot

Spring

Spring Cloud

Microservices Architecture

Azure

JavaScript

React

Angular

PERSONAL PROJECTS

Flooss

- Flooss is a Banking alternative that offers an array of financial services to provide convenient, reliable & affordable experiences for everyone in Bahrain.
- **Role & Responsibilities:** Design microservices-based architecture.
- Prepared documentation and participated in the interview and hiring process in order to make a development team.
- Backend development of APIs exposed to front-end clients and back office portal.
- Design and build a transaction lifecycle to make sure idempotent.
- Responsible for creating batch jobs using Spring batch to process large amounts of data in the form of CSV.
- **Technologies/Frameworks:** Maven, Git, Spring boot, Spring Cloud, Microservices, JavaScript, SQL, REST APIs, Confluence, HTML, Jira, Relational Databases, Hibernate, MySQL, Linux fundamentals.

Walmart

- <http://www.walmart.com>
- Walmart Inc. is an American multinational retail corporation that operates a chain of hypermarkets, discount department stores, and grocery stores from the United States.
- **Role & Responsibilities:**
- Led Walmart Cost and Reorder team which deals with all prescription related data from Third party vendors to Walmart.
- Successfully migrated old projects based on old C language with embedded SQL to Java Microservices.
- Communication with business and line manager, estimating features and playing the role of scrum master.
- Responsible for creating batch jobs using Spring batch to process large amounts of data in the form of csv.
- Created a knowledge base for new Engineers joining the team.
- **Technologies/Frameworks:** Java 11, Spring boot, Jenkins CI/CD, Maven, Kafka
