I'm a successful software developer offering **10** years of experience in demanding environments focused on producing cutting-edge systems in a variety of domains and tech stacks. My strongest skills are **Node.js, TypeScript, Vuejs, Reactjs, Go/Golang, Flutter, Microservices** and **Docker** for rapid development and scaling. I have significant experience working in startups and fast-moving teams with fixed deadlines. Quickly learns and masters new technologies while working in both teams and self-directed settings.

## Skills

1. Javascript(8), Typescript(5), VueJs(5), Vuex(5), Nuxtjs(3), Nextjs(7), ReactJs(8), Redux(5), Html(8), CSS3(8), SCSS(7), JQuery(8), Json(7), XML(4),
2. Flutter(5), Dart(5), React Native(5)
3. NodeJs(7), Python(4), Django(4), Numpy(3), matplotlib(3), Go(5), GraphQL(5), PostgreSQL(5), Java(1), Spring boot(1)
4. AWS(4), Google Cloud Platform(5), Azure(1), Docker(4), Microservices(5), Git(8), Agile Methodology/Jira(5)

## Experience

Feb 2021 - Jan 2023 · San Francisco, CA, USA

**GitStart** – Software Engineer/Tech leader(*contract/remote*)

- **Led four (4)** software engineers in delivery of web scraping engine project, resulting in well-collected data for further analysis. Delegating tasks in weekly sprints and running daily standups
- Worked closely with Product Client and teammate to build a generic web scraper to scrap any Ecommerce site to get product details stack. Tech used are Go,Go-colly and PostgreSQL
- Delivered Nium's Banking-as-a-Service (BaaS) Platform which is a flexible, comprehensive, and easy-to-embed fintech infrastructure platform with timeframes. Frameworks used are ReactNative, GraphQL, GO and deployed at AWS cloud services
- Worked with a software engineers team to deliver Sourcegraph fast and featureful code with optimized search and navigation engine. Framework use Go, TypeScript and deployed at AWS cloud services

**Skills:** React, React Native, GraphQL, Go, Amazon Web Services, PostgreSQL

Mar 2022 - Sep 2022 · San Francisco, California, United States

**Phonon X, Inc** – Flutter Developer(*contract/remote*)

- worked on a carbon voice flutter project with a team.
- Carbon Voice creates a better way to talk and share.
- The Carbon Voice platform handles the complexities of audio to enable a range of experiences for you to engage with your team, customers, and partners while on-the-go.
- Team Chat: A better way to talk & share with your on-the-go, distributed teams
- CarbonLink: Give your customers, partners, audience, and field teams a link to start a voice conversation with you.
