

## **Senior SAS Programmer – Oncology (2 openings)**

2+ year contract – fully remote

- We are currently looking to hire an experienced Sr. Clinical SAS Programmer to join our team to support our pharmaceutical client in a long-term, remote contract.
- The ideal candidate would have a BS in Computer Science, Statistics or Science related field and at least 7+ years of experience working as a Clinical SAS Programmer in the Pharmaceutical, CRO or Biotech industry.
- Experience working within the oncology therapeutic area is also required.
- The Senior Clinical SAS Programmer will be technically focused working directly with client project team members to produce project deliverables.
- Good communication skills are required especially around technical and project team issues.
- BS degree in a computer science, statistical, or science related field is a minimum requirement
- The expectation is that the Senior Clinical SAS Programmer would be “hands on” programming 100% of his/her time on tables, listings, figures, and SAS datasets.
