ENGINEERING PROJECTS

Dashboard as a Service

Ongoing

- Developed a graphical visualization of data for better understanding through visualization and customizable charts.
- Technologies: **JavaScript, HTML5, CSS, REST API, MongoDB, AngularJs, Node.js**, - (MEAN stack), JMeter testing, Mocha.

Interactive frontend project: Daily news Website

- In this project we are using two free API's to display daily updated news. There is a homepage where general news is displayed with a YouTube video in iframe. And we have five sections of news: Finance, Politics, Science, Sports, Technology.

Tech Stack : Html, CSS, JavaScript

Interactive fullStack project: Doodly

A social media site for impromptu artworks! Draw from scratch on our embedded canvas or upload a picture of your own to modify.

Node.js app using **Express.js**, the **Handlebars** templating engine, a **MySQL database**, and **Sequelize ORM**. And deployed on **Heroku**.

OTHER ACHIEVEMENTS

- Event Lead at Student Orientation at Algonquin College.
- Greeted and engaged with all new students regarding events of International Students Orientation.
