WORK EXPERIENCE

Senior Software Engineer
CommentSold

11/2021 - 03/2023   *Remote*
SAAS Retail Platform for selling through live video through social media.

- Developed a Greenfield React application called "Marketplace" to showcase client live streams using a single platform.
- Collaborated on the development of a new Vue 3 application to white label the CommentSold platform for large retailers.
- Actively maintained the core Laravel and Vue CommentSold application, ensuring its smooth operation and enhancing its functionality.

Software Consultant
Solution Design Group

09/2019 - 10/2021   *Golden Valley, MN*
Software consulting company.

- **Cargill** - Maintained and contributed to Cargill's design framework in React, while also assisting in the maintenance of their Java Spring backend.
- **Protolabs** - Developed and contributed to an internal manufacturing tracking tool using Vue with TypeScript.
- **AsseTrac** - Built a greenfield React application utilizing AWS Amplify to track construction assets in real time.

Web Developer
Morsekode

02/2019 - 09/2019   *Minneapolis, MN*
Advertising and marketing agency.

- **University of Northwestern (https://unwsp.edu)** - Website redesign and upgrade to CraftCMS 3, which required rebuilding a custom CraftCMS.
- Greenfield Vue application with Laravel for sharing video revisions with clients.

Full Stack Developer
Avallo Incorporated

08/2016 - 02/2019   *Maple Grove, MN*
Web development company focused on custom websites and apps.

- **Three Rivers University** - Built a training website for onboarding employees using JQuery and PHP.
- **SeniorCommunities.guide** - Built a greenfield Angular app to help families and seniors find an ideal senior community.
- **PathwaysMinneapolis.org** - Built a complex report system in Vue and PHP that allowed admins to easily create reports via my custom GUI. The reports were generated dynamically from several MySQL tables.

SKILLS

JavaScript   TypeScript   Vue.js   React
Node.js   Next.js   Angular   GatsbyJS   MySQL
SQL   PostgreSQL   AWS   Linux   Composer
HTML5   CSS3   Sass/SCSS   LessCSS   Git
Bash Script   JQuery   Docker

PERSONAL PROJECTS

JustinJordan.io (02/2019 - Present)
- Personal blog site built using GatsbyJS/React and Wordpress. https://github.com/justinjordan/jjio-gatsby
- Rebuilt using Next.js in 2023

ParcelJS Talk (02/2020)
- I demonstrated how to build a web app from scratch using Parcel and Vue with a sprinkle of Rust and WASM. It was based on a blog post I wrote a few years ago for my personal blog.
- https://justinjordan.io/blog/getting-started-with-wasm-using-parceljs-and-rust/

Meddle Templating Engine (08/2018 - 03/2019)
- Meddle is a PHP based templating engine that I built inspired by Twig, but has a Vue.js style syntax.
- https://github.com/justinjordan/Meddle

EDUCATION

Liberal Arts
Minneapolis Community & Technical College

07/2014 - 06/2016   *Minneapolis, MN*

Audio Engineering Diploma
Masters Recording Institute

05/2009 - 07/2010   *Edina, MN*
